

# MIPS MADE EASY WITH HEALTHADVANTA

**PICTURE A FOUR-STORY HOSPITAL.** Each floor of the hospital is responsible for a different aspect of care provided. While each floor is focused on meeting the requirements and needs of their own department, all departments must come together to create a fully integrated and successful hospital. Connecting all of these departments isn't necessarily easy, but with preparation, planning, and a proven formula, it can be done.

If you are a Medicare provider, this is exactly what CMS has asked you to do under the Merit-based Incentive Payment System (MIPS), a program that incentivizes or penalizes providers based upon the annual submission of quality data. MIPS is comprised of four components: Quality, Promoting Interoperability (PI - formerly known as Advancing Care Information), Clinical Practice Improvement Activities (CPIA), and Cost. Each of these four components are unique and complex. Seamlessly integrating all four components can be challenging, but failure to do so will put your fee-for-service payments at risk.

HealthAdvanta can help physician practices, hospital systems, and accountable care organizations improve and optimize MIPS reporting to CMS. We engage our clients from planning through data submission, helping them navigate a complex process to maximize incentive opportunities while minimizing the workload associated with reporting.

As a Medicare provider, you may be eligible for an incentive from CMS for your participation in MIPS

# WHAT'S YOUR PLAN FOR GETTING THERE?

# HEALTHADVANTA WILL HELP YOU DESIGN, IMPLEMENT, AND EXECUTE A MIPS STRATEGY THAT WORKS FOR YOUR PRACTICE AND YOUR CLINICAL WORKFLOWS.

## FULLY CUSTOMIZED REPORTING STRATEGY

Every specialty, and every practice, is different; there is no "one-size-fits-all" solution for MIPS. With nearly 300 quality measures and 100+ clinical practice improvement activities to choose from, it takes knowledge, insight, and experience to select the ideal complement of information to report. We focus on understanding how you work and document clinical information to plan your optimal strategy.

### EXPERIENCE WITH PROVIDERS LARGE AND SMALL

Our customers range from solo providers to groups employing several hundred physicians. Since HealthAdvanta was founded in 2015, we have helped thousands of clients report quality data to CMS, yielding significant incentive payments.

### PERFORMANCE MONITORING AND SEAMLESS SUBMISSION TO CMS

HealthAdvanta is a CMS-approved Qualified Registry and a Qualified Clinical Data Registry (QCDR), supporting Quality data submission and attestation for both Promoting Interoperability (PI) and CPIA categories. Our proprietary web interface and dashboard make it possible to track performance and to project MIPS scores in near real-time. We assist our clients with process improvements that can enhance MIPS performance.

### **EHR AGNOSTIC**

We have supported clients with a wide range of electronic health record systems, including GE Centricity, eClinical-Works, NextGen, Medent, gGastro, MOSAIQ, ProVation, and many others. We pride ourselves on our ability to accommodate our client's unique workflow and documentation constraints.
